MATH 110: Calculus I

The background is a dark, textured surface covered with a dense, chaotic pattern of mathematical symbols and numbers. These include various fonts of numbers (0-9), plus signs, minus signs, multiplication signs, division signs, and percent signs. The symbols are rendered in shades of teal, light green, and white, creating a complex, almost abstract visual field. A dark, semi-transparent rectangular box is centered over this pattern, serving as a backdrop for the text.

Questions?

Lab 8

- In your own words what is the number e
- What is it used for?
- What do you like about e ?
- Does it make you think of other numbers?
- Why is it called e ?
- What is your favorite function involving e ? Why?
